Benchmark	Bloomberg Developed markets Mid & Small Cap Index

The fund has sustainable investment as its objective as set out in article 9 of the SFDR. The sustainable investment objectives of the fund are to:

- Finance solutions that enhance child prosperity
- Promote a safe and clean environment for children
- Contribute to the transition to an economy where all children can enjoy a prosperous life.

Triodos Future Generations Fund invests in shares of listed companies that support an ecosystem of equal opportunity, health and well-being, education and safety for children.

We select companies that, through their products, services or processes, materially contribute to the welfare of children across the world by addressing at least one of the following areas: child health and survival, access to education, protection from violence and exploitation, environment and climate, and equality and inclusion. Additionally, the companies we invest in must comply with the Triodos minimum standards.

This product is not without risks. Please see the prospectus and the KID for more detail.

Highlights

- Triodos Future Generations Fund generated a return (after costs) of -0.63%, while the benchmark yielded -3.52%.
- April was a very volatile month for equity markets, yet when measured in dollars, equity markets rose a little bit. The weakening of the dollar versus euro, because of erratic US government policies, caused returns in euro to be quite negative. Defensive sectors in general outperformed cyclical ones.
- Amidst all the volatility, the fund reported a small negative return and performed comparatively well. Relative performance was driven by the Communication Services sector. Portfolio companies in this sector are not directly exposed to US tariffs and have so far reported solid results. The fund's biggest exposures are the Health Care and Industrial sectors

Net Return in %

As per end of April 2025

	1M	3M	YTD	1 Y	3Y avg	5Y avg
Fund	-0.63	-6.02	-2.09	8.69	0.43	-

Nordic Swan Ecolabel

Principal Adverse Impact Indicators (PAIs)

GHG intensity of investee companies: The GHG intensity is a relative measure of greenhouse gas (GHG) emissions. It is the amount of GHG produced per unit of revenue generated by the company, measured in tonnes of CO₂ per EURm generated in revenue. The carbon intensity is then weighted using the portfolio weight to get a weighted average for the portfolio.

Non-recycled waste ratio: For each company the non-recycled waste ratio is the total amount in metric tons of non-recycled waste produced divided by the amount invested in EURm. This is expressed as a weighted average.

Excessive CEO pay ratio: This metric measures the ratio within investee companies of the annual total compensation for the highest compensated individual to the median annual total compensation for all employees.

Risks

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. The product may be exposed to risks, such as concentration risk, currency risk and small- and mid-cap equity risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

When investing in the fund, please take into account all the characteristics and/or objectives of the promoted fund as described in its prospectus. Further, please take notice of the sustainability aspects of the fund as found [here](#).
